1. Executive summary

26	18	69.2%
ITEMS ANALYSED	FLAGGED BY MODEL	FLAG SHARE
5	**13**	**0**
HIGH / CRITICAL	AUTHORS INVOLVED	ANALYSIS ERRORS

The model reviewed 14 post(s) and 12 comment(s) from the source page and flagged 18 of them (69.2%) as gender-based cyberviolence or hate speech against women, with a mean confidence of 0.91 / 1.00. The most severe flag is HIGH, spread over 13 distinct author(s).

Most prominent concerns

- Silencing / discrediting — 13 flagged item(s) (72% of flags) · Gendered attempts to silence women (e.g. 'go back to the kitchen')
- Sexist stereotyping — 13 flagged item(s) (72% of flags) · Demeaning gender stereotypes presented as fact
- Misogynistic insults — 6 flagged item(s) (33% of flags) · Gendered slurs or insults aimed at a woman/women

2. Methodology, scope and limitations

How the content was collected

- Public content was collected from the page <https://www.facebook.com/groups/1380102887485248> on 2026-10-21 12:24 UTC using a dedicated research account; collection ran in a headless browser session and captured the visible post and comment texts.
- Each item carries a SHA-256 hash of its original text and a collection timestamp, so any excerpt in this report can be re-verified against the raw JSON/CSV export that accompanies it.
- Author names are NOT pseudonymised — this file contains real identity data and must be stored securely and minimised before wider use.

How the items were classified

- Every item was classified by the language model “google/gemma-4-e4b (local, LM Studio)”, running entirely on the analyst's machine (LM Studio). No text was transmitted to any cloud service.
- The model judged each item against the taxonomy in section 3: whether it targets a woman or women because of gender, on a scale none → low → medium → high → critical, with a per-item confidence score, a target group, a language guess and a short verbatim evidence excerpt.
- Flagged items are sorted by severity, then by confidence. Statistics and charts in section 4 cover flagged items only.

Limitations — read before acting on any finding

- Model output is an automated first-pass flag, not a legal or factual determination. A human must review every flagged item before it is used in reports, publications, takedown requests or complaints.
- Dialects (esp. Arabic, Tunisian Darija and Arabizi), sarcasm, coded language and missing context can cause false positives and false negatives. Quotes are excerpts, not complete items.
- Sampling stops at the configured post limit and comment threads may be incomplete; the absence of flags is not proof of absence of GBV.

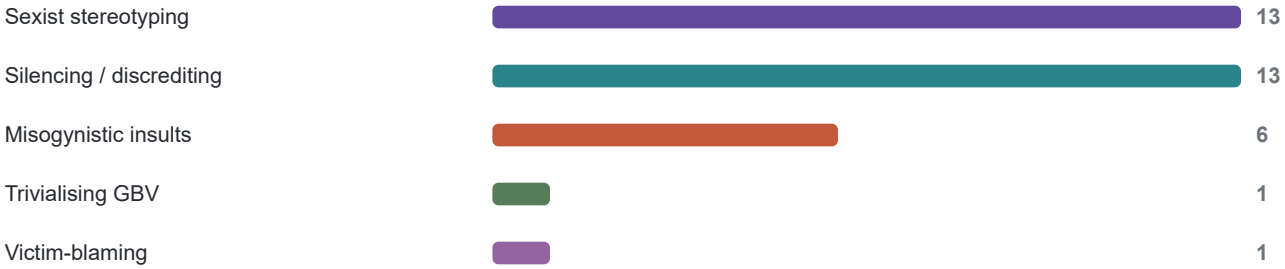

3. Classification taxonomy

Categories below were used during classification (editable in analyzer.py). Severities: none = not a violation; then low, medium, high; critical = explicit threats of rape or death, doxxing intended to enable harm, or sextortion.

Category	Definition
Sexist hate speech	Generalised hatred/contempt toward women as a group because of gender
Misogynistic insults	Gendered slurs or insults aimed at a woman/women
Sexual harassment	Unsolicited sexual comments, propositions or sexualised content
Threats of violence	Threats of rape, physical harm or death against a woman/women
Incitement to violence	Calls for others to harm, punish or 'discipline' women
Body / slut-shaming	Attacks on appearance, sexuality, 'honour' or morality
Doxxing / privacy violation	Exposing address, phone, private photos or personal data
Stalking / intimidation	Persistent targeting, surveillance or intimidation
NCII / sextortion	Non-consensual intimate images, blackmail, sextortion
Victim-blaming	Blaming women for violence they suffered
Silencing / discrediting	Gendered attempts to silence women (e.g. 'go back to the kitchen')
Trivialising GBV	Mocking, denying or minimising violence against women
Sexist stereotyping	Demeaning gender stereotypes presented as fact
Other GBV	Other gender-based online violence not covered above

4. Findings at a glance

By category of abuse

By severity

By target group

By language

Flagged items by type

Distribution: 18 flagged item(s) from 13 author(s); 17 carry a confidence of 0.75 or higher. Prioritise the severe items (high / critical) for human review — they follow in section 5.

5. Flagged items — detailed records (18)

18 record(s), most severe first. The banner colour encodes severity (deep red = critical, orange = high, amber = medium, olive = low). Each record is designed to be copied or photographed into an incident file as-is: verify the evidence excerpt and the permalink against the original post, then mark the review line under the record.

والآن اليوم خسارة أيضا، تتفق عليه منذ ولادته. وعندما يكبر يقول لك: هل استشرتني قبل أن تلدني؟
لهذا أنا في الثلاثين من عمري بلا زواج ولا أولاد. لأن الزواج لم يعد يقنعني.
